SecuriSense™

Adding intelligence to cash machine protection

Globally, ATMs and similar machines are under ongoing threat from many types of attacks. SecuriSense is an innovative solution to detect and deter against attacks such as cutting, drilling, grinding, hammering, pull out or explosive gas. It continuously monitors the ATM, and if an attack is detected, the unit triggers and communicates with the ATM or an interfaced solution.

When the Crime Occurs

SecuriSense will detect the attack and communicate with the ATM or to an interfaced solution, such as 3SI ink-staining systems (SecuriDab®) or 3SI GPS tracking system (ATM Tracker™). The system can optionally activate sirens or flashing lights, and/or display a message on the ATM screen to inform the criminal that the attack has been detected.

Features

- Compact design
- Detects explosive gas, drilling, cutting, and pull out attacks
- Additional outputs and CAN BUS to interface to other 3SI protection systems
- Dedicated outputs for connection to 3rd party security systems
- No programming /configuration needed on site
- Easily fits inside the safe of most cash machines
- Offers a wide range of protection against most common attack types
- Easy plug-and-protect
- Minimal maintenance required
- Fully compatible with 3SI's "Layered Security" approach and solutions

Risks Covered

- Explosive gas
- Cutting
- Drilling
- Grinding
- Hammering
- Pull out

Professional After-Sales Service

Our innovative solutions are supported by a world-class service organization

• On-site installation, service and training available

• Performance Warranty backs our commitment to deliver results

About 3SI

53 years of experience and specialized knowledge in the **Security field**

24/7 US-based support

Long-term relationships with the industry, built on **trust and satisfaction**

Partnered with over **10,200 law enforcement agencies**

Over **19,000 criminals apprehended** and **$150M in assets recovered**

Our solutions

Tracking uses multiple technologies to help police track crimes, recover stolen property and arrest criminals

Cash Tracing uses ink, smoke and dye to foil robberies, recover stolen cash and apprehend criminals

SaaS Safety Systems use APP technology to protect staff members against crime and provide detailed reporting to increase efficiency and reduce costs
