

## Vault Tracker™

### Protects and tracks cash stolen from vaults or safes

Vaults and safes store larger amounts of cash, making them popular targets for robbers. Vault Tracker is a GPS tracking device that automatically triggers a silent alert when it detects a crime and starts updating its location to 3SI's advanced tracking system. It can also be used in concert with 3SI's Cash Tracker™ for added security.

#### When the Crime Occurs

Once the tracker is activated, our own 24/7 security team and local law enforcement are instantly informed. Our advanced tracking system reports the location of the cash every step of the way while law enforcement pursues and apprehends the robbers.

#### Features

- Protects cash where it is stored
- Covert and blends with other cash
- Triggers automatically after detecting continuous motion and silently reports to 3SI tracking website
- Location updates to secure website every 6 seconds via GPS, Cellular and Wi-Fi
- Reliable performance ensured via semi-monthly health check with cellular connection
- Text and email notifications of activations and device status
- Stores location data if cellular signal is lost to preserve tracking data
- RF to pinpoint final device location
